# Cellular Computing (Series In Systems Biology)

## Synopsis

The completion of the first draft of the human genome has led to an explosion of interest in genetics and molecular biology. The view of the genome as a network of interacting computational components is well-established, but researchers are now trying to reverse the analogy, by using living organisms to construct logic circuits. The potential applications for such technologies is huge, ranging from bio-sensors, through industrial applications to drug delivery and diagnostics. This book would be the first to deal with the implementation of this technology, describing several working experimental demonstrations using cells as components of logic circuits, building toward computers incorporating biological components in their functioning.

## Book Information

Series: Series in Systems Biology

Hardcover: 240 pages

Publisher: Oxford University Press; 1 edition (August 5, 2004)

Language: English

ISBN-10: 0195155394

ISBN-13: 978-0195155396

Product Dimensions: 9.2 x 0.8 x 9.7 inches

Shipping Weight: 1.1 pounds (View shipping rates and policies)

Average Customer Review: Be the first to review this item

Best Sellers Rank: #738,303 in Books (See Top 100 in Books) #111 in Books > Science & Math

> Physics > Nanostructures #113 in Books > Science & Math > Physics > Molecular Physics

#119 in Books > Computers & Technology > Computer Science > AI & Machine Learning > Neural Networks

## Customer Reviews

Martyn Amos is at University of Exeter.
