Gr 3-8 • This book presents a rare perspective into the creatures of the deep, with engaging images and clear facts. Sharks are the main focus, but there are captivating chapters devoted to many other creatures, including the giant clam, spiny devil fish, sea horse, Gentoo penguin, and sea otter, making this title ideal for research purposes and pleasure reading alike. The animals are divided into five sections: "Amazing Anatomy," "Animal Athletes," "Life Stories," "Supernatural Senses," and "Exploring the Deep." Topics such as size, life span, and diet are

featured for each entry, and often charts accompany the facts. Detailed diagrams and large, stunning, colorful photographs complement the captivating text. VERDICT Secure this work as an awe-inspiring resource on sharks and other wildlife of the deep for students and teachers. — Beth McGuire, Hempfield Area School District, Greensburg, PA

This is my 6 year old sons favorite book, he carries it around with him and we read it every night. It is definitely a visual book with high quality full page color photos and cool graphics, less written information that captures interesting facts, diet, location etc. It also includes other creatures of the sea, and would be a great book as a gift or a reference book for a home library.

My son loves this book. He has autism and sharks are his new obsession. Very easy for him to read.

This is a beautiful book! The size of the book and the clarity and size of the illustrations make it a unique and informative book about sharks and other creatures. My 7 year old grandson loves sharks and this book.
