Tiny Houses In The City

Synopsis

A presentation of micro-scaled contemporary residences that demonstrate domesticity can be both compact and beautiful. How we live in citiesâ"smaller, denser, smarter"âis at the heart of *Tiny Houses in the City*. Urban areas across the globe are experiencing a renaissance, with once-forgotten downtowns and neighborhoods becoming increasingly popular for redevelopment. This book looks at the tiny house movement through the lens of metropolitan life. *Tiny Houses in the City* features an international collection of more than thirty homes that exemplify compact living at its best. The houses, apartments, and multifamily buildings and developments included make great architecture out of challenging locations and narrow sites. Focusing on dwelling spaces all under 1,000 square feet, *Tiny Houses in the City* illustrates strategies for building tiny in urban areas that include urban infill, adaptive reuse, transforming and flexible living spaces, and micro-unit buildings. The projects range from a 344-square-foot studio apartment in Hong Kong with movable walls, transformable furniture, and hidden storage that can be configured into twenty-four unique scenarios in a single space, to a townhouse-like London residence built in an old alley between two stately homes. Many of the residences chronicled in *Tiny Houses in the City* are indeed unique in design, but their economical size and ingenious interior spaces are the epitome of practicality and illustrate an acute understanding of compact living and its potential for the urban realm.

Customer Reviews

"The notion of how we live (think 'smaller, denser and smarter') in a large city is the basis of

journalist and critic Mimi Zeiger's new book *Tiny Houses in the City*. Citing the tiny house movement in once-forgotten urban neighborhoods all over the world, the author compiles the spaces of more than 30 houses, apartments, and multi-family dwellings under 1,000 square feet. . . Unique, economical, creative, and practical, compact living via tiny houses may be the wave of the future." -ARRAY MAGAZINE

Mimi Zeiger is a journalist and critic. She is the West Coast editor of *The Architect's Newspaper* and has written for several publications including *The New York Times*, *Domus*, *Dwell*, and *Architect*. She is the author of *New Museums*, *Tiny Houses*, and *Micro Green: Tiny Houses in Nature*.

Disappointing for everyday inspiration. Houses were sparse and not enough interior ideas.

Loved her last two books- and this one too. I also saw her speak at a MA workshop too- Zeiger does great work.....

I was wowed by how the photographs and descriptions in *Tiny Houses in the City* showcase the creativity of architects and author. I was much in awe of the example of how building tiny can provide affordable housing to help the most needy.
