Rod Powers retired from the United States Air Force with 23 years of service. A world-renowned military careers expert, he advised thousands of troops about all aspects of U.S. Armed Forces careers. Angie Papple Johnston joined the U.S. Army in 2006 as a Chemical, Biological, Radiological, and Nuclear Specialist, ready to tackle chemical weapons in a Level-A HAZMAT suit.

I purchased this book for my daughter and she said it really made learning simple. She was very pleased.

Good for the prepare exam

Good book. Very helpful. A few typos in the Math section. But otherwise, very good, great study guide.

Good job

This was an excellent study guide for the ASVAB! I had graduated high school over 7 years ago so being able to brush up on my algebra and geometry was extremely helpful. It was an easy read and with 4 or 5 practice tests I felt prepared when the day to take the test actually came. I wasn't blindsided by any of the questions because the format was so similar to this book.

Good

Wow, it changed my whole perspective on what was going to be on the actual test. A lot of the things in the practice test were things I really didn't know, especially in the mechanical and electronics knowledge. Of course, those sections don't exactly count unless you're pursuing a job in

those fields, but a lot of the knowledge in the practice tests are very useful. Having not taken a mathematics course for awhile, it was good to retest my abilities on their problems. Whether or not you really want to score high on your ASVAB, I would suggest it just for keeping you sharp.
