## Customer Reviews

I just returned from a road trip of Slovenia and Croatia with a little Bosnia for a day. It's a perfectly fine paper map, which I personally still prefer over GPS (faster, no battery issues, bugs, etc.). My minor critiques are that sometimes the road numbers aren't conspicuous and that the size of the map makes it unwieldy (lots of folding and re-folding, which more quickly deteriorates the paper). Please know that the countries' road signs most often use "city destinations with arrows pointing the direction" (e.g. "Split --->

I little bit helpful, but the road depicted on the map from Sarajevo to Dubrovnik WAS NOT THERE! It was a cow path full of ruts and gullies, where we could only drive 5 MPH for hours and it was a part of the country with no cell signal so we had no other guidance. We lost a half day in Dubrovnik as a result.

This is a larger scale map and you should not expect too much detail - but good for planning a general route. Paper could be heavier so be gentle!

The road markings were accurate- it was easy to follow and read, and conveniently folded to a manageable size although it did rip slightly at the folds It was great for the big picture ( which GPS does not do well) although it did not get in to the smallest country roads.

The map itself is a good map. Many pros. The only con is if you use it frequently it's paper would be damaged soon. Risky bends. Daniela

If you were born in Yugoslavia and want to see how it got divided, this map is for you. The borders changed and you find out what your birth place is called now.
