Textbook Of Veterinary Medical Nursing, 1e

Synopsis

This veterinary textbook is the first of its kind, providing information aimed specifically at medical nursing. Concepts build on the level of knowledge consistent with the RCVS Veterinary Nursing syllabus, providing an in-depth, high-level approach to medical nursing and its practical applications. A two-color format highlights key elements of the text and clarifies illustrations. This is the first textbook to focus on the medical nursing of small animals. Appropriate for all levels of study as well as being an invaluable reference source for practice. The authors have first-hand knowledge of syllabus requirements as well as practicalities of everyday practice. Quick quizzes at the end of each section provide an additional learning tool. Easily accessible information and extensive illustrations make this book an essential purchase for anyone who cares for small animals. A two-color format highlights key elements of the text and clarifies illustrations.

Customer Reviews

"To my knowledge this book is the first of its kind to be dedicated to medical nursing and from a veterinary nursing perspective. The cover is glossy and professional looking and the size of the book makes it easy to handle and not too big to carry around but thick enough to give the feeling of value for money." In each section there are bold subheadings and the use of colour (uniform throughout the book) helps draw your attention to the headings. The use of tables is common throughout the book. These are easy to read and informative and again the use of colour draws your attention to them and facilitates the ease of reading. Diagrams are again plentiful and are

coloured (differing shades of red) and these are professional, detailed and clear."I used the book repeatedly as a reference source during my working days to seek out information as and when a question occurred. This gave me a good feel for its breadth and depth of coverage."I would recommend this book to all student Veterinary Nurses, Qualified nurses and diploma nurses as a useful tool to gain further knowledge. But I would say although it gives a good base, you would need to build on that and seek more information. This is a well presented, professional, easy to read, informative book and well worth the money." Helen Stephens, VN, Journal of feline medicine and surgery, December 2003

was pleased to receive this text as I am currently studying for the Medical Diploma in Advanced Veterinary Nursing. Although I have been using a range of books aimed at both vets and VN's so far, it was excellent to see a book which covers the syllabus for the Medical Diploma so precisely. I found the most useful aspect of this book is the style of the chapters. As each major body system is discussed, the normal anatomy and physiology is described in detail, before covering each relevant condition or disease. This was invaluable to me for refreshing my knowledge of what exactly goes on, before learning what can go wrong! The main problem with this book was each time I took it to practice, it disappeared! I would say this book definitely appeals to all members of the practice." Kate MacQuire, VN, Veterinary Nursing Times, December 2003

definite must for the practice library! This comprehensive text is the first of its kind covering solely medical veterinary nursing. Its in-depth chapters cover everything the practising veterinary nurse needs to know about medical nursing! It covers the medical section of the veterinary nursing NVQ syllabus so it is ideal for NVQ candidates, but it would also be a good basic reference for diploma students." Claire McLaven, VN, Veterinary Nursing, August 2004

Ordered back in Feb. 2009, NOTHING, finally got an ae-mail 2 months after the fact, saying I need to confirm I still want the book because they can't FIND IT! Why advertise for something they don't got is beyond me, but Ordered through Barnes and Nobles, recieved book, about a week later, would have been sooner, but Mt. Redoubt wasn't cooperating with my shipment, Never confirmed with I still wanted the book, but they still sent it to me, FINALLY recieved book AFTER classes were over for which I needed the book! Not happy, It may cost a little more, but from now on going through Barnes and Nobles for my college course materials.
