Average Customer Review: 4.6 out of 5 stars 32 customer reviews

Best Sellers Rank: #12,015 in Books (See Top 100 in Books) #12 in Books > Education & Teaching > Schools & Teaching > Instruction Methods > Science & Technology #19 in Office Products > Educational Supplies > Teaching Materials > Professional Development Resources #31 in Books > Science & Math > Earth Sciences > Geography

Age Range: 3 and up

Grade Level: 3 and up

## Customer Reviews

This is a good, basic beginning to understanding how to read maps, and basic understanding of world geography. The book is outlined as an assignment per day format, but we have used it as a once per week assignment (doing all of the assignments for that week in a day), which seemed to be more logical (the one assignment per day would take about 3 minutes, not enough time to "get into it"). It has accurate, clear directions and has been a great geography adjunct text for my 3rd grader, who can work independently with it. Enjoying it!

With all the time that must be devoted to reading, writing, and math, this daily practice is perfect for those few minutes each day that I carve out for geography. We sat down with our junior high and

high school social studies teachers, and they told us that they wished students coming into their classes had more geography background, especially familiarity with maps and how to read them. It's easier to teach the Civil War battle history when students can look at the geographical components that contributed to the outcomes. This book gives students a chance to work with maps and gain that familiarity needed years later in secondary grades.

This is a great add on for our homeschool. It is just enough to get the main idea and not be overwhelming with all the info.

This is a real good layout and very educational. Some topics are too easy for a third grader.

This works great, good quality and awesome for the kids.

My daughter and I are enjoying the geography lessons. It is silly how each chapter is divided to be taught in a classroom over a whole week when the work of one chapter can be completed in about 10 to 15 minutes. We do one chapter a day as part of our homeschooling over the summer (my daughter attends school the rest of the year). Regardless of the layout, the chapters are good for learning US geography, especially for kids who go to schools that don't think geography is important. I plan to get the 4th grade level when we finish this one.

I love this series! I used it with my fifth graders and when I moved down to third this year I knew I had to buy it for them. I use it as our daily morning work. kids are really enjoying it.

We use this along with our history curriculum. It's fun, interesting and informative. My 8 year old is picking up the map studies quickly. I know he will be prepared for testing this year.
