Text: English

ITMB Publishing (International Travel Maps and Books) of Vancouver, Canada, has published detailed reference and travel maps of countries, regions, and cities around the world since 1985. The company's titles include many that are unique or the first of their kind, including the first commercially available travel map of South America.

It is quite a bit of money for a piece of paper. It is not in great detail either. I wouldn't buy it again if I had the opportunity. I could have just as easily looked at my atlas, which is probably what I should have done.

Smaller size than the Hema map I also purchased. Relief in different colors makes landforms easier to understand. Very complete coverage of places in the country.

I am a research entomologist studying certain groups of insects on New Guinea. Frequently, localities mentioned on sample data labels (villages and small towns) are not indicated on most atlas maps. This map has many more such localities than do most maps and is thus very useful to me. Additionally, the boundaries of the provinces are clearly indicated. I have thus found this handsome map very useful. For anyone travelling to PNG, this is the map to get!

This map is fabulous. It has all the detail I wanted. The best part is that it lists airstrips, although the topography is pretty great too. I also like that it has many rivers labeled.

There is absolutely no place on our planet like Papua New Guinea. Wild, wonderful, lawless, infrastructure-less adventure awaits.
