FIVE STARS ***** Just got my copy and I highly recommend you do too! At 708 pages, this is easily the best and most comprehensive book of its kind ever published for private practice optometrists. Written by Dr Neil Gailmard, who is arguably the leading speaker and writer on practice management for ODs, this book contains page after page of practical tips and advice. It's a great reference manual from a man who built one of the largest private practices in the country and is more than willing to tell you how he did it.

What a fantastic book! I value Dr. Neil Gailmard's practice management expertise and have benefited from his outstanding guidance over many years. This book will be a treasured possession of all optometry educators, students, doctors of optometry, and those working in the eye care industry. If you want a road map to optometry practice success this book is a must read!

Hello All, I just got a chance to spend some time with Dr. Gailmard's new book and I love the way it is done and how complete it is. You just cannot get better information about this profession ANYWHERE. There is the world class how to experience shared in both what works and why and what doesn't. If you own or manage in an optometric practice and want to succeed and grow, this book is your guide. Enjoy! Buy the book and use it, you will never be happier. Mike

This book is a real diamond and not a zircon. Neil Gailmard has done a splendid job of sorting and consolidating his weekly tips and, even more importantly, he has put them in categories for easy reference not only for the new optometrist who is "still not dry behind the ears" and eager to become a success but also for the older OD who wants to take a moderately successful practice to a new level. I rate this book FIVE STARS.
