Customer Reviews

Rebels, patriots or mutineers it all depends on your perspective. A secret organization behind the most corrupt members of the government. What is their agenda and how powerful are they? But series is getting better.. Although you could read this as stand alone you will understand more if you read series in order. The author is finally starting to write full books with organized plots. Like many a heroine we find out that Athena may really be a princess in disguise. This just makes her father slightly more despicable in hindsight. But even as a "princess" people are out to kill her and the same secret enemy plots against Mars and her other home planet.

This is a really good book that has you rooting for Athena and especially Wilson, all the way to the end. TS Paul doesn't disappoint. In my opinion, the series so far is awesome. I just WISH that they had started on Audible with book one. Starting on book 7 of a much loved series is just wrong, I couldn't even recommend it to anyone because they know nothing about the main character. You can enjoy the books from start to present on .Com. That is what I recommend, and that is why I can only give it 4 stars.

Continuation of a great series. Story can stand on its own but it's well worth buying the previous installments. Not a long story - great weekend read. I've already purchased the next books in the series.

Very good . Reading the rest of the series.

AAA+++

it is great
