## Customer Reviews

Joyce Y. Johnson, PhD, RN, CCRN, is Dean and Professor of Nursing at Albany State University. The author of multiple bestselling nursing books (including *Smith-Temple/Johnson, Nurse's Guide to Clinical Procedures*), Dr. Johnson is well-known for her ability to break

down the most difficult nursing topics into easy-to-understand lessons.

In general this book was fine. It didn't provide some sort of epiphany on the topics and I don't think it really helped increase my grades. I felt like this book was great when the textbook feels overwhelming. I buy these books to help break down the wordy material in textbooks and provide a great overview of the topics I'm being tested over. So, in conclusion, this did in fact do the job of covering material concisely but I would have done fine without it. I would recommend the review and rationales series instead.

great book to breakdown the subject

I was so stressed out about my Maternity class, that I completely forgot about this book! In search for some way to pass my OB Final with only a couple days to study I remembered my smart purchase of this demystified series. This book versus my text is so much easier to understand; it's such a guidance with the tests and quizzes provide. I can't believe I didn't open it much sooner..I woulda coulda woulda...but Didn't, but this book seriously saved my grade and from wasting my money from retaking the course.I love the demystified series.

I didn't like the set up of the book or the explanations of the disease processes...but my professor had a student who did...so...it was set up different than how I was taught...

This book helped me pass a pretest for RN school.

Great study guide. I wish I would of focused on the post partum and Apgar info for my HeSI. That's was majority of it! Good luck!

Good

This guide is very useful and helpful for me to study with. Easy to understand and plenty of room to take notes.
