This cookbook starts with really helpful tutorials on how to make staples like legumes and grains. It has charts for how long to cook and how much water to use for chickpeas versus kidney beans (for example). As a longtime meatatarian, this book has been an enjoyable and accessible entry point

into eating more plant-based meals. (A good foil would be Ottolenghi's popular cookbooks, which are also gorgeous and very vegetable forward but a little more intimidating). The recipes are varied and beautifully shot - she sections them off by season, which is a delineation I've never seen before. Sarah's writing is both literary and easy to follow, which I appreciate as a budding food geek and lifelong book geek.

Delicious recipes, beautiful pictures, makes the thought of using unfamiliar ingredients or techniques inviting. Very happy with this cookbook.

The "Life Changing Loaf of Bread" recipe is worth the price of the book. After avoiding bread in my diet for years, this is a healthy, delicious, easy to prepare loaf that's great toasted for breakfast. It does require longer baking time in my oven, than the recipe states, Can be tricky toasting it. I use a pizza stone, instead of baking it directly on the rack as the recipe states. Planning on trying more recipes soon.

This is one cookbook I can't put down. I have tried several of the recipes and they are delicious. Sarah Britton knows her food.

One of my all-time favorite cookbooks, but my all-time favorite food blogger. It can be really hard to find the exotic ingredients she has in her recipes, but the beautiful photos make up for it.

This has already become a favourite cookbook in a house that already has a large collection of them! First off, the recipes are all delicious, combining ingredients in creative ways with amazing results, and are often much easier and quicker to prepare than I might have assumed. She does a great job of organizing the recipes by season and also putting little blurbs of information throughout the book describing the health benefits of various ingredients. And there are some really fun food projects to try in here - I never thought I'd make homemade ginger ale, but I gave it a shot and am loving the results! Favourite recipes (so far): chocolate cherry overnight oats, green galaxy smoothie bowls, quinoa risotto, lentil salad...the list continues to grow. Highly recommend this book!

Best veggie cookbook ever! I love Sarah's blog and have been following it for over three years now. She's so creative with her recipes and they are delicious! You can totally see that she put her heart and soul into this cookbook. I am so glad I bought this book as it will be put to good use in my

kitchen.

She is hands-down my favorite food blogger. Everything she makes is SSSOOOOO tasty. I love the section in the back where she talks about all the different oils, grains, super foods, etc. I cannot recommend this book enough!
