Controlling Pilot Error: FATIGUE by James C. Miller. After reading the chapter on sleep biology and napping in this book, you may reconsider whether to take that afternoon or red-eye flight. In this slim volume, you will find information on how performance effectiveness drops from 98 percent in the morning to 80 percent or less when compromised by staying awake too long or by accumulating a sleep deficit. And it turns out there is a downside to automation in the cockpit--increasing the workload of monitoring responsibilities and decreased vigilance. This is an excellent primer on sleep even for the non-pilot. It includes a helpful discussion of the effects of drug sleep aids. Also included are examples of National Transportation Safety Board summaries of actual aircraft accidents and their possible causes. This is one in a series of 10 books on the challenges pilots face. The other books in the series deal with such topics as weather, communications, automation, controlled flight into terrain, and training and instruction. Additional topics covered are checklists and compliance, maintenance and mechanics, and situational awareness. Miller's book on fatigue covers sleep biology, jet lag, cumulative fatigue, good sleep hygiene, and other areas. The author is director of the

Chronobiology and Sleep Lab at Brooks Air Force Base, San Antonio, Texas.

Great information in this book. These helpful hints can be applied to any situation where there is great risk when in a fatigued state, not just flying, although it does cover time zone problems for commercial pilots, problems most people don't even think about. I kept this book after I read it. I found it an interesting read.

Good tool to understand and teach the tools necessary to safely fly and to understand the threats that aircrew face with the insidious effect of fatigue. This book along with the others in the series is invaluable to facilitate safe flying and teaching of same

Now that's a product....This is a solid piece of steel... Much more than I expected.... SINDY very love it , good . very recommend . good product with high quality.
