Freedom Of Transit And Access To Gas Pipeline Networks Under WTO Law (Cambridge International Trade And Economic Law)

Synopsis

Gas transit is network-dependent and it cannot be established without the existence of pipeline infrastructure in the territory of a transit state or the ability to access this infrastructure.

Nevertheless, at an inter-regional level, there are no sufficient pipeline networks allowing gas to travel freely from a supplier to the most lucrative markets. The existing networks are often operated by either private or state-controlled vertically integrated monopolies who are often reluctant to release unused pipeline capacity to their potential competitors. These obstacles to gas transit can diminish the gains from trade for states endowed with natural gas resources, including developing landlocked countries, as well as undermine WTO Members' energy security and their attempts at sustainable development. This book explains how the WTO could play a more prominent role in the international regulation of gas transit and promote the development of an international gas market.

Customer Reviews

This book analyses all major WTO provisions relating to the transit of pipeline gas and is essential reading for practitioners and regulatory authorities interested in the WTO's regulation of trade in energy, as well as legal and non-legal researchers analysing energy-related issues that are indirectly related to WTO law, and generalists in the field of public international law.

Vitaliy Pogoretsky works as Counsel at the Advisory Centre on WTO Law, where he assists developing-country Members of the ACWL and the least-developed countries in WTO dispute

settlement proceedings, and provides these countries with legal advice and training on WTO law. He has also worked at the Rules Division of the WTO Secretariat, FratiniVergano - European Lawyers, and as a civil servant of the Government of Ukraine.
