If you're just looking for transcriptions of a lot of good rock songs, this may be for you. Be aware that there is absolutely no information about drawbar settings and the like for any of them. Also, I was surprised that some good songs were not present. For example, 'Whiter Shade of Pale', or 'Black Magic Woman'. Some of the songs that are featured are unfamiliar to me, but on the whole, there are enough classics to make it worth the purchase, especially since they appear to be pretty spot on with regard to accuracy. Just really wish they'd include the drawbar and Leslie info to help you get

the sound as well as the notes.

Hal Leonard usually does a good job. If you think the whole transcription for ABACAB is here, don't buy this. They skipped the whole synth solo in the middle of the song. VERY LAZY transcription.

Excellent!

Very accurate
