The Making Of Strategy: Rulers, States, And War

Synopsis

Moving beyond the limited focus of the individual strategic theorist or the great military leader, *The Making of Strategy* concentrates instead on the processes by which rulers and states have formed strategy. Seventeen case studies--from the fifth century B.C. to the present--analyze through a common framework how strategists have sought to implement a coherent course of action against their adversaries. This fascinating book considers the impact of such complexities as the geographic, political, economic and technical forces that have driven the transformation of strategy since the beginning of civilization and seem likely to alter the making of strategy in the future.

Book Information

Paperback: 704 pages

Customer Reviews

"This book traces the processes that resulted in military strategies in 17 cases, ranging from ancient Greece and Rome to American nuclear strategy....Each essay is self-contained, and academics searching for brief but expert analyses of strategic case studies for teaching purposes will welcome this book." *Foreign Affairs*"...the essays, including those on Israel and the United States in the nuclear age, are presented with remarkable verve and freshness." Brian Bond, *Times Literary Supplement*"The essays by some of the finest strategic analysts in the world, both historians and historically minded political scientists, are of a uniformly high quality. *The Making of Strategy* is an exceptional work. Anyone who wishes to understand the essence of strategy-making as a process, and the factors that influence strategy-making will profit by reading these essays." Mackubin T. Owens, *Strategic Review*"One of the advantages of the book is its essays on lesser-known periods for some powers....Military historians and political scientists can benefit from this work, as can

students from the upper-division undergraduate level onward." R. Higham, Choice "The Making of Strategy: Rulers, States, and War offers an important collection of essays which examines the process of strategic decision-making from the Peloponnesian Wars to the nuclear age." The International History Review

Seventeen case studies--from the fifth century B.C. to the present--analyze through a common framework how strategists have sought to implement a coherent course of action against their adversaries. They concentrate on the processes by which rulers and states have formed strategy.

Good stuff. Some chapters (chapters by different authors on different topics) not so good but still very interesting read

A solid compendium of nation-state strategies throughout various historical periods and evolutionary states of governments. The editors did a good job of bringing many important but disparate discussions together. To maximize the value of this book, a solid familiarity with Clausewitz's On War (at least book 1) is a prerequisite for understanding many of the precursory descriptions of concepts attributed to him.

This book has been great. Had to purchase for a class I was taking and I really appreciated the style which has different chapters with different authors dealing with different time periods/regions. Each chapter is written like a research paper and well supported with properly cited sources making this a solid reference material for any reader. I normally get rid of most of my college books but this one I am keeping not only for use in later research papers I am writing but also because I'm a fan of it. Highly recommended.

Just an excellent book. It was a textbook last term in uni and I know why. High quality work, although the title should be related to its historical theme, since it's more about history and less about theory. But other than that, it's highly recommended.

I bought this book due to a Master's class I am taking with American Military University, while I'm deployed. The book arrived in great condition and quickly. The seller was prompt in notifying me of when it would arrive, as I was afraid I would already be deployed when it got to my mail box. The book itself is interesting, but I've only started the first 3 chapters...

Outstanding at understanding particular empires, kingdoms etc., at particular points in time. This ranges from the Ancient Greece to Nuclear Strategy of the Cold War and the future challenges.

Insightful rendering of diverse campaigns.

Very nice writing
