## Customer Reviews

Meet the giant saguaro cactus, native of the Sonoran Desert. Discover the stages of the saguaro's long life span and see how it is a protected part of the desert ecology and culture.

It you have ever stood next to these giants you would find yourself completely amazed. These giant's start as the littlest seeds you've ever seen (I grow them!). And to look at them fully grown you wonder how they ever made it from that little seed. It takes 50-70 years just for this plant to grow it's first arm. This book is great. It cover's every aspect of these beautiful giants. And it has lot's of great pictures which is a plus. I really recommend reading this book if you are a cactus lover or just an everyday outdoor person. After reading the book - take a trip to Tucson, AZ. Go through Saguaro National Park and find yourself stunned by this cactus plants story and beauty. Take in the site's around Tucson too..... It's a beautiful fun town!!!!

Hubby loved getting this for Christmas, as these cactus are one of his interests. Written for older kids/adults.

good buy

We are long-time cacti owners and have read numerous books on them. This is one of the top five we have purchased and used.
