Engineering In Our Everyday Lives (Engineering Close-Up)

Synopsis

From video games and sports equipment, to cars and cleaning products, many of the things we use everyday were designed by engineers. This exciting title incorporates child-centered examples and engaging text to capture the readers attention as they explore the connections between engineering, science, and technology, and discover how engineering impacts our day-to-day lives.

Book Information

Lexile Measure: NC810L (What's this?)

Series: Engineering Close-Up

Paperback: 24 pages

Publisher: Crabtree Publishing Company (February 15, 2014)

Language: English

ISBN-10: 0778700992

ISBN-13: 978-0778700999

Product Dimensions: 7.8 x 0.2 x 7.8 inches

Shipping Weight: 3.2 ounces (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars 5 customer reviews

Best Sellers Rank: #175,771 in Books (See Top 100 in Books) #86 in [Books > Children's Books > Science, Nature & How It Works > How Things Work](#) #231 in [Books > Children's Books > Education & Reference > Jobs & Careers](#)

Age Range: 6 - 9 years

Grade Level: 1 - 4

Customer Reviews

purchased for grandson who loves it.

Grandson loves it

My grandson who wants to be an engineer was excited about the book!

Starting with a riddle: What does a bridge, running shoes and a roller coaster have in common?, this book uses colorful photos, along with sidebars that have facts or questions in them, to capture young readers' attention. It covers what technology is, some terrific tools related to it, ways technology keeps people safe, how it's constantly changing, how engineers think, how technology is

both helpful and harmful, what kinds of engineers there are, some things to help readers decide if engineering is for them and where to learn more. There is a word index in the back with pronunciation and definitions of bolded words in the text. Overall it's an engaging and decent look at engineering and technology for younger readers.

This wonderful book written by Reagan Miller introduces young kids to Engineering and is suitable for ages 4 to 10. It explains how many of the things we use everyday are designed by engineers such as video games and sports equipment, to cars and cleaning products. This exciting book includes child-centred examples and engaging text to capture the readers attention as they explore the connections between engineering, science, and technology, and discover how engineering impacts our day-to-day lives. Overall, I found this book highly informative & engaging. It also asks questions which encourages children to think about things. Children will identify the engineering that impacts their day-to-day life. Readers will also find insightful sidebars, text-dependent questions, word Index and research projects to encourage deeper analysis. I highly recommend this book and look forward to sharing this with my 5 year old niece. Review by Fatima Khan, Associate Producer, ReadingWithYourKids.com
