My 7 and 9 year old boys love all of these books! I enjoy reading them/with them as well. Very informative and entertaining at the same time. These books really have jump started my youngest sons interest in reading.

My grandson love it.

grandkids liked it. I'm glad I bought it for them..

This series of books are well designed. The heavy use of pictures with short descriptions are perfect

for keeping a child's interest. Just enough information is given with vividly drawn pictures, allowing one to be pulled in and absorbed by the content. My son is 8 and this series totally captivates him! It's a fun book to look at and read through together as well. Quite informative!

I have been reading these You Wouldn't want to series and I have found them to be very entertaining and informative. Children will enjoy this one about being a WWII fighter pilot. The story starts before the war about a young man who loves airplanes. It tells how he learns to fly, then joins the RAF. He then goes on combat mission. There are many little tidbits of information sprinkled in this story about England during the War, the cockpit, and also the different types of fighter jets. For those students who like airplanes or history of WWII, they will enjoy the well illustrated and informative book.
