100 Most Destructive Natural Disasters Ever

Synopsis

Gigantic, powerful, devastating--these are the 100 most destructive natural disasters ever. Next in the successful 100 MOST series, 100 Most Destructive Natural Disasters Ever will feature the world's most devastating hurricanes, earthquakes, and other natural disasters. This book will investigate Mother Nature's worst moments, from the 2004 Indian Ocean tsunami that killed over 200,000 people to the historic 1900 Galveston hurricane. It's everything you ever wanted to know about natural disasters and a whole lot of things you didn't.

Customer Reviews

Anna Claybourne has written many books for children including, all of the previous books in the 100 Most series.

My son absolutely adores this entire series. The books, being reasonably priced and part of a series, make excellent gifts for small token occasions. They're also portable, which is a big deal for my son, who loves to take his books with him wherever he goes.

I don't usually look at all the details, because I like to buy on impulse. So I'm not sure if it gave dimensions of the size of the book, but I was expecting it to be much larger. It's pretty small, and shows small pictures and little comments. Not full on pictures a page. Was somewhat disappointed.

My kids love the book. All of the books that she has. They read it over and over again and still find it fascinating. Thank you Claybourne.

My niece has loved every one of these 100 most books that she has read. It is not easy to get her to read and she loses interest quickly in most books, but that is not the case with any of these 100 most books. I recommend all of them!

We do a routine before bed which includes us parents reading a blurb from a book. This book has the perfect sized pages for the limited time. My kids like hearing about disasters so this book was a hit.

This was a hit with my nephew! He really loves these books! They are very interesting to read! I am hoping more will come out soon!

Great!

Information limited. Format and book quality of book terrible.
