Customer Reviews

“Aronson marks the one-year anniversary of the collapse of a Chilean copper mine that entombed miners for more than two months with a riveting, in-depth recounting of the events that held the world rapt. Twelve short chapters with photos and diagrams keep the story well-paced as it alternates between above- and below-ground scenes, detailing the heroic efforts of the trapped men, their waiting families, and their rescuers, sometimes on an hour-by-hour basis. Extensive author and source notes, a bibliography, and suggested reading leave plenty for readers to explore.” --Publishers Weekly, June 13, 2011, *STAR “Leave it to Aronson. Photographs, maps, diagrams and a wild range of literary references, from Merlin to Harry Potter, Percy Jackson and Hephaistos, enliven the volume. The author uses these familiar

touch points to help tell a complicated story, blending them with such highly technical information as mining machinery to keep his narrative flowing. —Kirkus Reviews, July 15, 2011

“Masterful storytelling brings to life a story that most think they already know; the 33 miners trapped in a Chilean copper mine for 69 days in 2010. It was a gripping story then, and Aronson manages to make it even more exciting, more inspirational, and more personal, all by gathering pieces of the puzzle and showing how they fit together. Explanations of how the Earth’s formation and plate tectonics created the copper lines that are so valuable to the world today are a critical beginning. Filling them in with a brief history of metalworking and mining leads readers to the small, out-of-the-way mine in the Atacama Desert region. From there the story becomes as intriguing and suspenseful as any work of fiction; the miners’ struggle to survive below ground is juxtaposed with the frenzy of the work aboveground by the mine officials, the government, and many others working to save the men. Detailed descriptions of the conditions that the miners endured and how they coped paint a vivid picture of just what an ordeal it was. The global response to the disaster was enormous, with organizations, governments, and individuals from Australia, New Zealand, the United States, and Japan offering resources and expertise to find a solution. Ample source notes, black-and-white photographs, websites, and a brief explanation of research methodology round out this must-have for any library. —School Library Journal, August 2011, *STAR

“Much more than just a chronicle of the Chilean mining disaster of 2010, Aronson’s well-researched and riveting book gives readers the sense that they’re in the San José copper mine. Peppered with engaging quotes, the text is fluid and attention-grabbing. —The Horn Book Magazine, August 1, 2011, *STAR

“There’s something here to rivet just about anyone, from gearheads who follow the approaches to drilling, to humanists who empathize with the trapped men and their anxious families, to nascent activists who recognize that behind the heroics lies a corrupt, neglectful system of mine operation that endangers workers to maximize profit. Students using this title as a foundation for a written report will appreciate the annotated sourcing, timeline, index, glossary, and perhaps most important, the motherlode of useful websites. Teachers and librarians might also want to direct their students’ attention to Aronson’s appended essay on how he conducted his own Internet-based research. —The Bulletin of the Center for Children’s Books, September 2011

“Aronson zips readers through a whirlwind primer. The succinct text is enhanced by a strong selection of photographs, illustrations, and diagrams, all of which help make the abstract technical issues clear. The remainder of the book is structured in a riveting day-by-day, “above-and-below” account of the rescuers’ struggle to

locate survivors and bring them to the surface. Well-chosen quotes and interviews humanize the headlines, and Aronson's dramatic writing achieves a sense of taut suspense that will captivate young readers. The extensive back matter includes biographical sketches of the miners, as well as a glossary, time line, bibliography, and list of suggested websites. Teachers will welcome this excellent title for classroom discussion, which closes with Aronson's "How I Wrote This Book," detailing his research methods. --Booklist, September 2011, *STAR "Nonfiction the way it is meant to be" riveting, educational, and entertaining! Aronson not only does a fine job of chronicling both the physical and mental ordeals the Chilean miners faced, but explains how the problem occurred, provides historical background, and details the various participants in the rescue attempts [fascinating reading!.... Give this to students who don't think they like nonfiction. Those that love history, geology, survival stories, scientific exploration, or even mythology will definitely enjoy it. --Library Media Connection, November/December 2011 "Aronson delivers a captivating account of the mine collapse [and] crafts vivid portraits of the miners' experiences underground, as well as those of the families and countrymen breathlessly awaiting their safe return. --Publishers Weekly, November 7, 2011, a "Best Books of 2011" selection

My 6th Grade daughter chose this book because she was told to read more non fiction. It's hard to find middle school non fiction and she really enjoyed this book. She said the writing style was engaging and felt like a novel and she even asked me to find other books by this author. 5 stars.

What a great book. My 11-year old daughter had to read it for summer reading and it was so well written for a middle schooler. I read it as well and loved it. It's a quick read!

Great book!

This book was on our summer reading list for middle school...my daughter loved it.

This is basically a narrative of a mine cave in. Not a compelling read, but interesting. I would give it a thumbs up.

intriguing background information to what these hero's endured. Including a background of where mining began~

It's an okay read but trying to enlarge graphics is a nightmare. The words blur to the point their unreadable.
