Voyages From Montreal Through The Continent Of North America To The Frozen & Pacific Oceans In 1789 & 1793 [Illustrated]: With An Account Of The Rise And State Of The Fur Trade, Volumes I & II

Synopsis

This book conveniently combines Volumes I & II into one book! About the author: Sir Alexander Mackenzie (1764 – 1820) was a Scottish explorer. He is known for his overland crossing of what is now Canada to reach the Pacific Ocean in 1793. This was the first east to west crossing of North America north of Mexico and predated the Lewis and Clark expedition by 10 years. This pre-1923 publication has been converted from its original format for the Kindle and may contain an occasional defect from the original publication or from the conversion.

Customer Reviews

I read this book the first time in the fifth grade. It is sort of dry information, but interesting. It is basically an outline of the commercial potential of Canada, with much history and data and observations to prove different ideas he had. I still want to drift down the Mackenzie to the Arctic Ocean because of this book, but now I am 63 and don't think I will get around to it.
