# Math Facts Made Easy: Learn All Your Facts In HALF The Time! (Instant Learning Series Book 1)

## Synopsis

Math Facts Made Easy is an easy-to-use system that shows you "how to learn" your math facts in as little as half the time that it normally takes! It includes a free math facts workbook for you to use and instead of the old fashioned math facts flashcards (shows you how to learn your facts by relying on the one system that works for A+ students! Math Facts Made Easy is part of the Instant Learning Series by best selling author Pat Wyman, and includes Spelling Made Easy, (ASIN number B009NWWW4S) Vocabulary Made Easy (ASIN number B00CIH36IG), Amazing Grades and more... Does your child use flash cards and still struggle with their math facts? If flash cards were the best strategy then every child would have an "A" and know their math facts perfectly. Math Facts Made Easy reveals the one strategy that the flash card strategy leaves out. The difference between a student who learns and remembers their math facts quickly is one simple visual strategy backed by brain research. This book gives you a free workbook with the facts from 2-12 that every child can use to learn their facts quickly.

## Customer Reviews

Awesome! Can't wait to put this into practice! I'm hoping this technique will help boost my children's confidence in reading and math.

great book

I purchased this product because I loved the spelling concept. After speaking directly with the author, Pat Wyman, I have had wonderful success downloading my workbooks. I am thoroughly delighted at the prospect of helping my daughter this evening. Pat Wyman is truly a caring individual who clearly puts her relationships at the same level as her work. Thank you so very much for helping me to figure out some of the nuances of the Kindle.

I have seen students go from D's to B's and A's on their report cards using the quick strategies in Pat Wyman's "Math Facts Made Easy." I am using these strategies to help my young clients see themselves as smarter than they really are. What a great discovery! What a boost to their self-esteem! J Collins Meek, PhD Neurological Learning Specialist docmeek.com

Math Facts Made Easy gives a simple strategy that most parents and teachers aren't aware of - and it really helps our kids learn their math facts so much faster. My students love the strategy and love the results even more - they KNOW their facts now! Pat Wyman, you've done it again -- Thanks so much! Bonnie Terry, author of *101 School Strategies for ADHD Kids (Winning the ADHD Battle)*

Math Facts Made Easy is just that! It's a very simple, easy to read step-by-step approach to helping kids learn math. I am really impressed with the content in this book. As a professional working with children, I am really happy to see the first part of this book helping parents identify their child's learning style. Too many school systems and teachers take a one-style approach to teaching, and that is one of the main challenges many kids struggle with in learning today. This approach will help you, the parent, have a better approach to helping your kids today. Rory F. Stern, PsyD Behavior Therapist <http://www.HelpYourADHDChild.com>

This has been my son's problem all along. He can memorize the Planets and their Moons and where they are in the solar system but was having a really hard time with simple math facts. Now I know what the problem is. I can't wait to try this new method out. Why don't all teachers use this

approach?

Who knew?? Math was a struggle in this house... with some interesting tips in this book that I never knew, it's gotten easier. The tips help with math and in daily life. I have tried it and it does work! Give it a shot and I think you will be pleasantly surprised.
