Defeat Cancer: 15 Doctors Of Integrative & Naturopathic Medicine Tell You How

Synopsis

ONE-ON-ONE WITH 15 CANCER DOCTORS: If you traveled the world for appointments with fifteen cancer doctors, you would discover many of the cutting-edge treatments used to heal the body from cancer. You would also spend thousands of dollars on hotels, plane tickets, and medical appointment fees—not to mention the time that it would take to embark on such a journey. Even if you had the time and money to travel, would the physicians have enough time to answer all of your questions? Would you even know which questions to ask? In this long-awaited book, health care journalist Connie Strasheim has done all the work for you. She conducted intensive interviews with fifteen highly regarded doctors who specialize in cancer treatment, asking them thoughtful, important questions, and then spent months compiling their information into organized, user-friendly chapters that contain the core principles upon which they base their approach to healing cancer. The practitioners interviewed are medical, osteopathic and naturopathic doctors, trained in a variety of integrative approaches to cancer treatment. All aspects of treatment are covered, from anti-neoplastic (anti-cancer) remedies and immune system support, to dietary and lifestyle choices that result in the best outcomes for patients. The book also offers unique insights into healing, such as the pros and cons of different treatments and how to intelligently use chemotherapy. It discusses patient and practitioner challenges to healing, factors that affect healing, treatment outcomes and how to effectively combine multiple medical strategies to obtain the best results. Finally, it offers helpful insights to the friends and families of those coping with cancer. Cancer treatment is complex and controversial, and this book puts the treatment information you need in the palm of your hand.

Customer Reviews

"Most conventional cancer treatments are tragically ineffective ...*Defeat Cancer* will provide you with a perspective that you will likely not hear about from your oncologists." --Joseph Mercola, DO, Founder, Mercola.com
"I have practiced medicine for 53 years, and a world without cancer is possible NOW. This book is a must-read and belongs in the hands of anyone who is affected by cancer." --Garry Gordon, MD, DO, MD(H), Leader, Kobayashi Cancer Study
"I wish this book had been available to me 12 years ago when I was diagnosed with cancer. Without exception, the doctors in this book are all true healers." --Richard M. Linchitz, MD, Founder and Medical Director, Linchitz Medical Wellness
"Here are well-experienced physicians you can 'interview' by reading their philosophy and approach. Cancer does not have to be a death sentence, even late stage." --Robert Jay Rowen, MD, Editor-in-Chief, Second Opinion Newsletter
"The conventional treatment of cancer is truly medieval -- anyone with cancer must read *Defeat Cancer* by Connie Strasheim. This is a book of survival, using the latest science in the reversal of this dreaded disease." -- Burton Goldberg, Consultant for Cancer Patients, author of 19 books and 5 films

Table of Contents:(Note: Due to space limitations, only 9 of 15 chapters are shown in the Table of Contents below)
CHAPTER 1: Stanislaw R. Burzynski, MD, PhD
Biography
What Cancer Is, What Causes It, and How to Treat It
The Role of Antineoplastons in Controlling Cancer Cells
How I Discovered Antineoplastons
Using Antineoplastons and Gene-Targeted Therapy to Treat Cancer
Treatment Process
Types of Antineoplastic and Gene-Targeted Medications
The Use of Antineoplastons for Other Diseases
Dietary and Supplement Recommendations
Preventing Cancer with Supplements
Detoxification
Treatment Outcomes
Training Other Doctors to Use Antineoplastons
Improving Cancer Care
The Problem with Conventional Oncology
When to Use

Conventional Medicine to Treat Cancer
Side Effects of Gene-Targeted Therapies
Other Factors That Affect Patients' Healing
How Family and Friends Can Support Their Loved Ones with Cancer
Roadblocks to Healing
Insurance Coverage for Treatments
The Politics of Cancer Treatment in the United States and My Battle with the FDA
The Future of Cancer Treatment
Last Words
Useful Websites
Contact Information for Stanislaw Burzynski, MD, PhD
CHAPTER 2: Nicholas J. Gonzalez, MD
Biography
What Cancer Is and What Causes It
Treatment Protocol
Diet
Nutrient Supplementation
Pancreatic Enzymes
Detoxification
Considerations in Treatment
Treatment Outcomes
Other Doctors Who Do Pancreatic Enzyme Therapy
The Role of Stress, the Mind and Spirituality in Healing
The Problem with Conventional Cancer Care
Why Oncologists Use Conventional Medicine, Even When It Doesn't Work
The Politics of Cancer and How It Affects Treatment Options
My Greatest Challenge as a Practitioner
How Friends and Family Can Support Their Loved Ones with Cancer
Last Words
Contact Information for Nicholas Gonzalez
CHAPTER 3: Robert Zieve, MD
Biography
What Cancer Is and What Causes It
The Role of Emotions in Cancer Development and Healing
Emotional Trauma
Treatment Approach
IPT--Insulin Potentiation Therapy and Metronomic Chemotherapy
Chemotherapy Sensitivity and Other Types of Testing
Addressing Growth Factors in Cancer
Building Up the Body with Botanicals, Vitamins and Other Nutrients
Improving Cellular Energy and Immune Function
Building a Treatment Protocol in Layers
The Multi-Faceted Benefits of Herbal Remedies for Treating Cancer
Detoxification
Dietary Recommendations
Treatment Outcomes
Patient/Practitioner Challenges to Healing
Risky Cancer Treatments and What Constitutes Good Science
Why Oncologists Aren't Open to "Alternative" Cancer Treatments
How Friends and Family Can Support Their Loved Ones with Cancer
Who Heals From Cancer?
Last Words
Contact Information for Robert Zieve, MD
CHAPTER 4: Colleen Huber, NMD
Biography
What Cancer Is and What Causes It
Treatment Approach
IV Treatments
Vitamin C
Alkalinizing Agents, Including Sodium Bicarbonate
Vitamin A
Considerations in Treatment
Dietary Recommendations for Healing
Treating Hormonal Imbalances
The Pros and Cons of PET Scans
Lifestyle Recommendations for Healing
Treatment Plan Duration
Treatment Outcomes
Roadblocks to Healing
Insurance Coverage for Treatments
Inexpensive Cancer Treatments
Ineffective/Dangerous Cancer Treatments
How Friends and Family Can Help Their Loved Ones with Cancer
Final Words
Recommended Resources
Contact Information for Colleen Huber, NMD
CHAPTER 5: Juergen Winkler, MD
Biography
How I Became Involved in Integrative Medicine
Treatment Approach
IPT--Insulin Potentiation Therapy
Chemotherapy Sensitivity Testing
Pre-Chemotherapy Nutritional Protocol
Tailoring Treatments to the Individual Patient
Conventional Chemotherapy versus IPT
Treating Hormone Imbalances
Treating Immune

System Imbalances and Infections
Balancing Brain Chemistry
Other Tests and Treatments to Heal and Support the Body
Detoxification
pH-Balancing Treatments
DMSO
Magnet Therapy
Dietary Recommendations
Treatment Duration
Logistics of Treatment
Treatment Outcomes
Roadblocks to Healing
Patient/Practitioner Challenges of Healing
Dangerous/Ineffective Treatments
Last Words
Contact Information for Juergen Winkler, MD
CHAPTER 6: Elio Martin Rivera Celaya, MD, with Steven Hines
Biographies
About Hope Wellness Center
What Causes Cancer
Testing and Treatment Approach
Controlling the Over-Expression of Estrogen Receptors on Cancer Cells
Restoring Proper Cellular and Immune Function with Electrolytes and Other Nutrients
The Relationship between Fungal Infections and Cancer
Anti-Coagulant Therapy
Inhibiting the MDR-1 Pump
Dendritic Cell Vaccines and Stem Cell Therapies
Dietary Recommendations
Detoxification
Balancing the Hormones and Neurotransmitters
Treatment Outcomes
Factors That Influence Healing
Roadblocks to Healing
What More People Should Know About Cancer Treatments
Our Greatest Challenge as Practitioners Who Treat Cancer
Dangerous and Ineffective Cancer Treatments
Inexpensive, but Effective, Cancer Treatments
How Family and Friends Can Support Their Loved Ones with Cancer
Final Words
Other Recommended Books/Websites
Contact Information for Elio Martin Rivera-Celaya, MD and Steven Hines
CHAPTER 7: Martin Dayton, MD, DO
Biography
What Cancer Is and What Causes It
Diagnostic and Testing Procedures
Treatment Approach
IPT-Insulin Potentiation Therapy
Natural Substances to Poison Glycolysis and Prevent Angiogenesis
Melatonin
Other Anti-Cancer Nutrients
Using Pharmaceutical Drugs Off-Label: Viagra, naltrexone and Persantin
Immune Support
Detoxification
Dietary Recommendations
Strategies for Emotional Healing
The Importance of Awareness, Spontaneity and Intimacy
Healing Regret, Resentment and Self-Righteousness
Using Energetic Devices and Homeopathy to Release Emotional Trauma
Treatment Outcomes
Roadblocks to Healing
Low-Cost Treatment Solutions
How Family and Friends Can Help Their Loved Ones with Cancer
Recommended Books and Websites
Last Words
Contact Information for Martin Dayton, MD, DO
CHAPTER 8: Robert Eslinger, DO, HMD
Biography
What Cancer Is and What Causes It
Strategies for Mind-Body Healing
Cancer Treatment Approach
Boosting Immune Function
Bio-Oxidative Therapies
Intravenous Vitamin C
Laetrile
Insulin Potentiation Therapy
MEAD Analysis and Balancing the Body's Meridians
Other Adjunct Treatments
Ultraviolet Blood Irradiation or Biophotonic Therapy
Revici Remedies
Poly-MVA
Heavy Metal Chelation
Detoxification
Earthing or Grounding Therapy

If you have cancer or know of someone who does (who doesn't?) and are the captain of your ship, then this book is a must read. It holds hope for those who have been told there is none by the allopathic practitioners. There are several doctors using this approach and it appears they are meeting with great success even with those given the "death sentence". Medicine is expensive whether covered by insurance or out of your pocket and most insurance companies won't cover homeopathic or naturopathic medicine procedures. What's sad is unless you have deep pockets the hope of these protocols may be beyond reach.

I have been working in the natural health field for over 18 years now, while specializing in cancer prevention the last 3 years. I have only read through part of this book and I keep saying wow, what a great book. The world needs more doctors like this; they really take the time to give each patient a specialized program for healing. I am learning so many new things about the reasons we get cancer and ways to heal cancer. I do wish that more people would care about preventing and healing cancer, as when they only do the conventional way, it just gets rid of the cancer (some of the time), it does not heal the body, nor heal the reason they got the cancer in the first place. It is time for people to wake up, especially when they get cancer, to heal and to go towards living a healthy lifestyle. If you only treat the tumor, then the cancer will come back, as you never healed the reason you developed the cancerous tumor in the first place. There are so many ways to prevent and to heal cancer. For more on preventing cancer: [...] For a chapter, by chapter review of Defeat Cancer please

Anyone who has had a cancer diagnosis, has a family member or friend who has been diagnosed with cancer should read this book! Hopefully, before they make a decision to pursue the recommended mainstream, traditional medical treatment for cancer. This book and the message it conveys just makes sense. It is a shame there are not more doctors throughout the U.S. that are willing to accept, and/or to convey to their patients that there are alternative cancer treatments available. A patient should be afforded the opportunity to make a well informed decision about their own medical treatment. Every cancer patient should be able to receive the cancer treatment of their choice locally, without having to travel out of their area (which is not an affordable option for many). Very informative book, about a very serious medical issue and other treatment options that are available, written in layman's terms which are easy to understand.

I would have loved to have had this book when my husband was diagnosed with throat cancer, five years ago. I don't know if he would have opted for a treatment different than the traditional poison/burn approach, but it would have been fantastic to have this resource on hand, to know what our options were and in case the traditional treatment failed to work. When you are dealing with a life-threatening illness like cancer, the Internet is incredibly helpful. But the "non-traditional treatment" information is mostly anecdotal, the amount of time you must invest to find answers is mind-boggling, and no single resource or site makes it convenient to intelligently compare alternatives. Defeat Cancer gives the cancer sufferers - and their loved ones - an invaluable resource. First, you will learn things about cancer that you will not learn from the Internet or the doctors who provide traditional treatment. Second, you will come to understand what options are open to you, and you will be able to choose one that appeals to you. If you would prefer to avoid the traditional almost-kill-the-patient approach, this book introduces you to the doctors who have had success curing cancer - even after the patients have gone through traditional treatment and the treatment has not eliminated the cancer from their bodies. This is rather amazing, given the shape someone is in after traditional treatment. At the end of his treatment (5 chemo treatments, 30 radiation treatments), my husband looked like he had been imprisoned in a concentration camp. He lost 30 pounds, and he was thin to begin with. It took four nurses to lift him out of his wheelchair and onto the radiation machine for his last few treatments. He is quite healthy now, thank God, even though he had a 5% chance of making it. The remaining after-effect of the radiation is salivary glands that are operating at about 10% of normal. He has borne this gracefully. We are both

thankful that he survived, but I would not wish the experience on anyone. Connie's book provides options and hope at a time when all hope seems lost. The format of the book, where each doctor tells his and her own story, gives you insights into the character of the doctor as well as the methods that the doctor has developed. When you're going through the cancer battle, you will want to choose a doctor that you are comfortable with. It makes a big difference. We were lucky; our general practitioner is a good guy who referred us to other good guys. The ear, nose and throat doctor, the oncologist, and the radiation doctor were all wonderful human beings who helped us get through the experience with compassion and concern. I highly recommend this book to anyone who is faced with cancer, or who loves someone who has been diagnosed.

Just received my book and pages 273-389 just literally fell out. Looks like they used a glue stick to bind the book. The individual pages are all out of order in a pile on the floor. Seriously???

Very informative, if I ever have cancer I am glad I have read this book. It's too bad that most doctors would rather use chemotherapy and radiation instead of natural remedies that don't poison the system. I highly recommend this book to everyone.

I've looked this one over and flipped through it. I don't know if these "cures" are true, but it is very interesting and if anyone is looking for alternatives to the usual protocol, I'd at least take a look at this book.

Information you get in this book is invaluable. Doctors of conventional medicine do not/will not tell their patients these things. Use the doctor references to get second or third opinions. Very informative.
