"As a licensed Family Therapist with a doctorate in Clinical Psychology who has been using hypnosis in my practice for over 17 years, I have borrowed from both fields to achieve a very effective program for helping people quite smoking for good. Experience has shown that when people have the cognitive tools to overcome smoking from a psychological perspective in combination with the immediate effectiveness of hypnosis it has a synergistic effect that can help people stop smoking more quickly and effectively than by psychotherapy or hypnosis alone. The listeners of "Stopping Smoking" get the cognitive tools they need to stay off cigarettes along with the immediate benefits of hypnosis for stopping smoking that ensure faster, more effective results."

I am usually a sucker for every bad marketing campaign for every bad product out there--knives, weight loss remedies, you name it. This CD is the first time ever that I have found a product that actually does what it says it does. I picked my stop smoking date, and literally the night before, I listened to this CD and instantly stopped smoking the next day. I won't pretend it was easy, but I can honestly say it was easier than I ever expected it to be. It was as simple as breathing away all my cravings and smoking behaviors. You don't know me but please take my word for it--if you are desperate to stop smoking and have tried everything else, including hypnosis, this CD will be all you need to stop smoking forever and with less cravings than you ever thought possible. This will be the best purchase you've ever made on ! I wish I could meet Dr. Walton and thank him personally for this CD.
